Precision Human Temperature Screening System

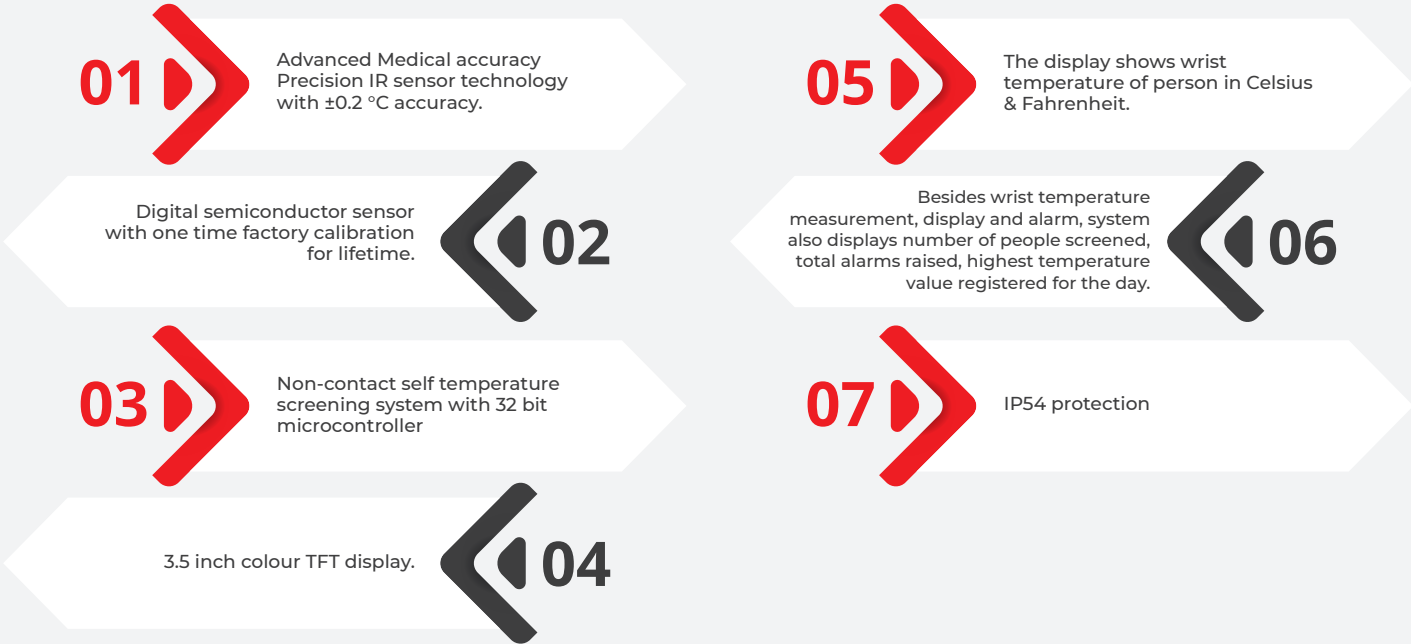

Being a Self Service Temperature Screening device, employees and visitors need to be prompted to get their temperature screening done at Entry/Exit points as per MHA-GOI guidelines . This is applicable for corporate workplaces, factories, Govt. offices, residential societies etc.

Audio/Visual Alarm can alert Supervisors for immediate attention and action. This avoids employing dedicated resource to screen all incoming employees and visitors .

In offices , temperature screening can be conducted twice a day. This will effectively help in screening users after confirming stabilized temperatures.
